

# The Tunnel Statistics 2018

16th of November 2018

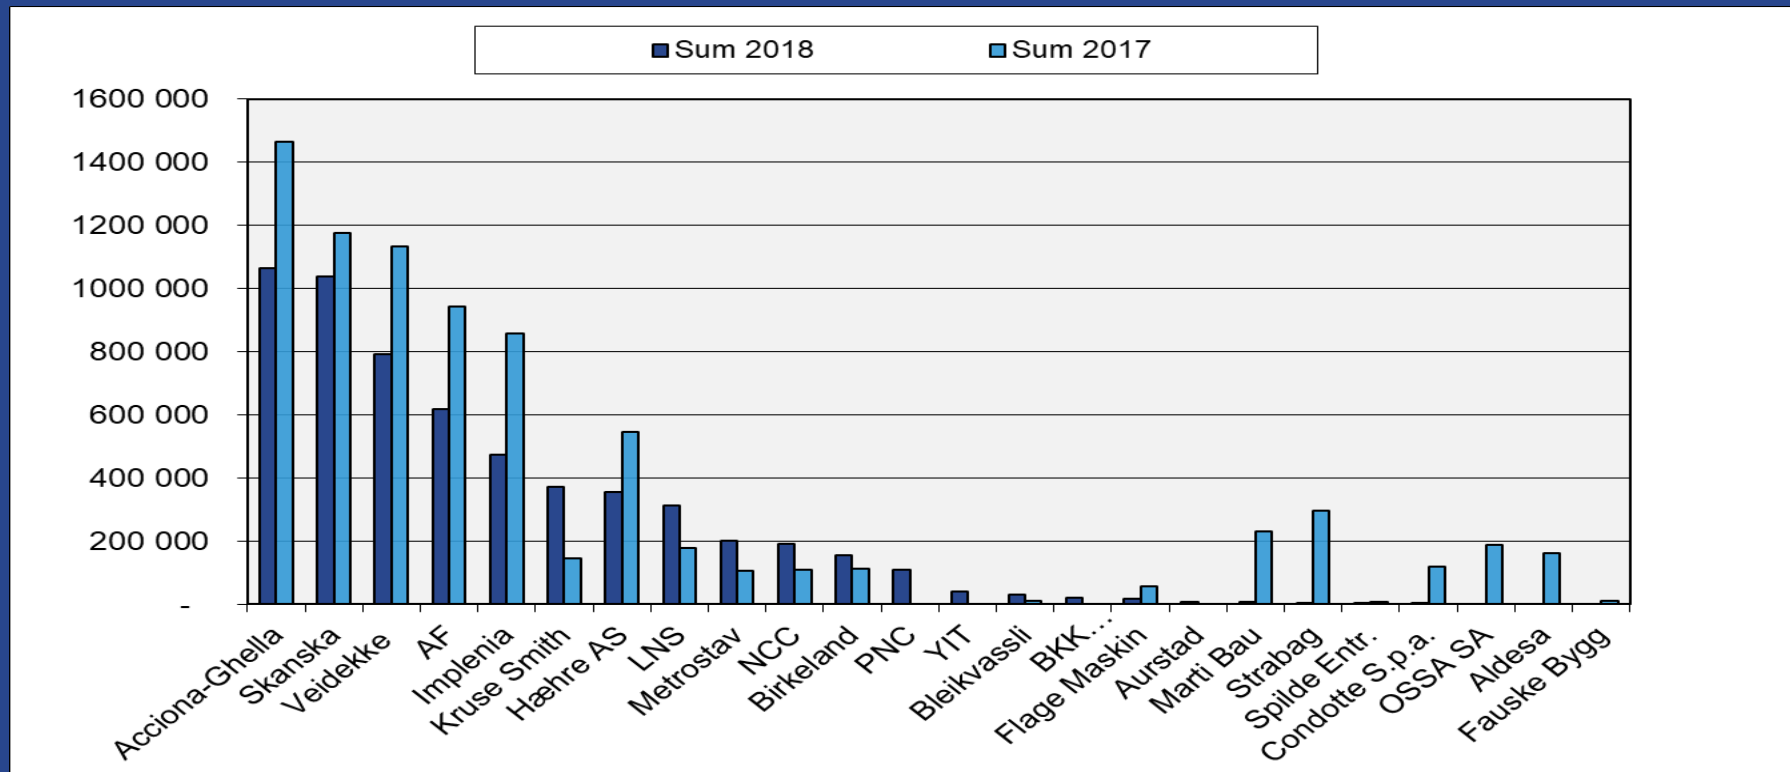

# 5.8 million fm<sup>3</sup> in 2018, - a reduction in volume for the first time since 2009

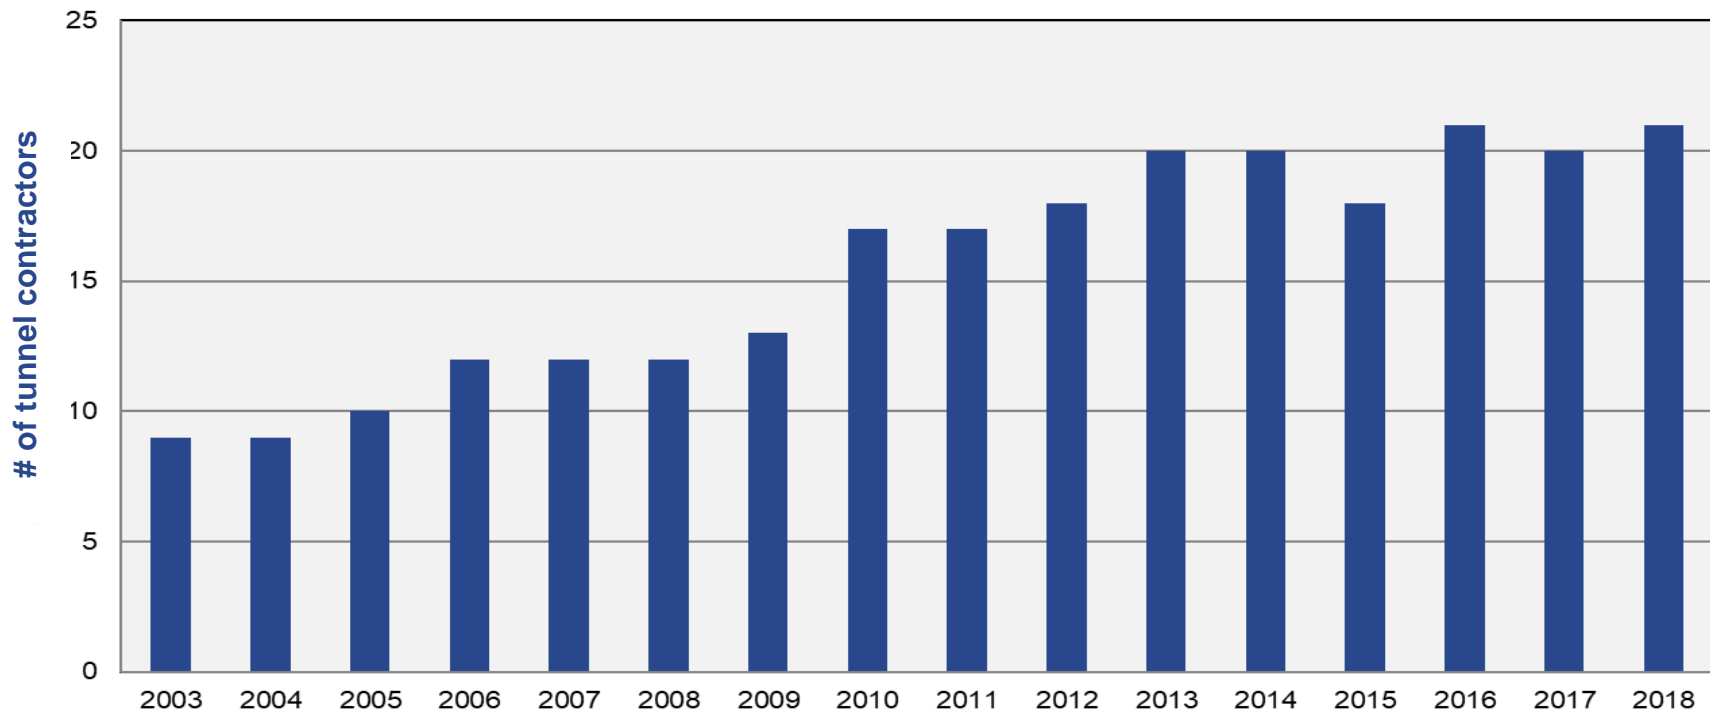

# The reduction in mainly within road and railroad tunnels, while it is an increase in water supply and hydropower

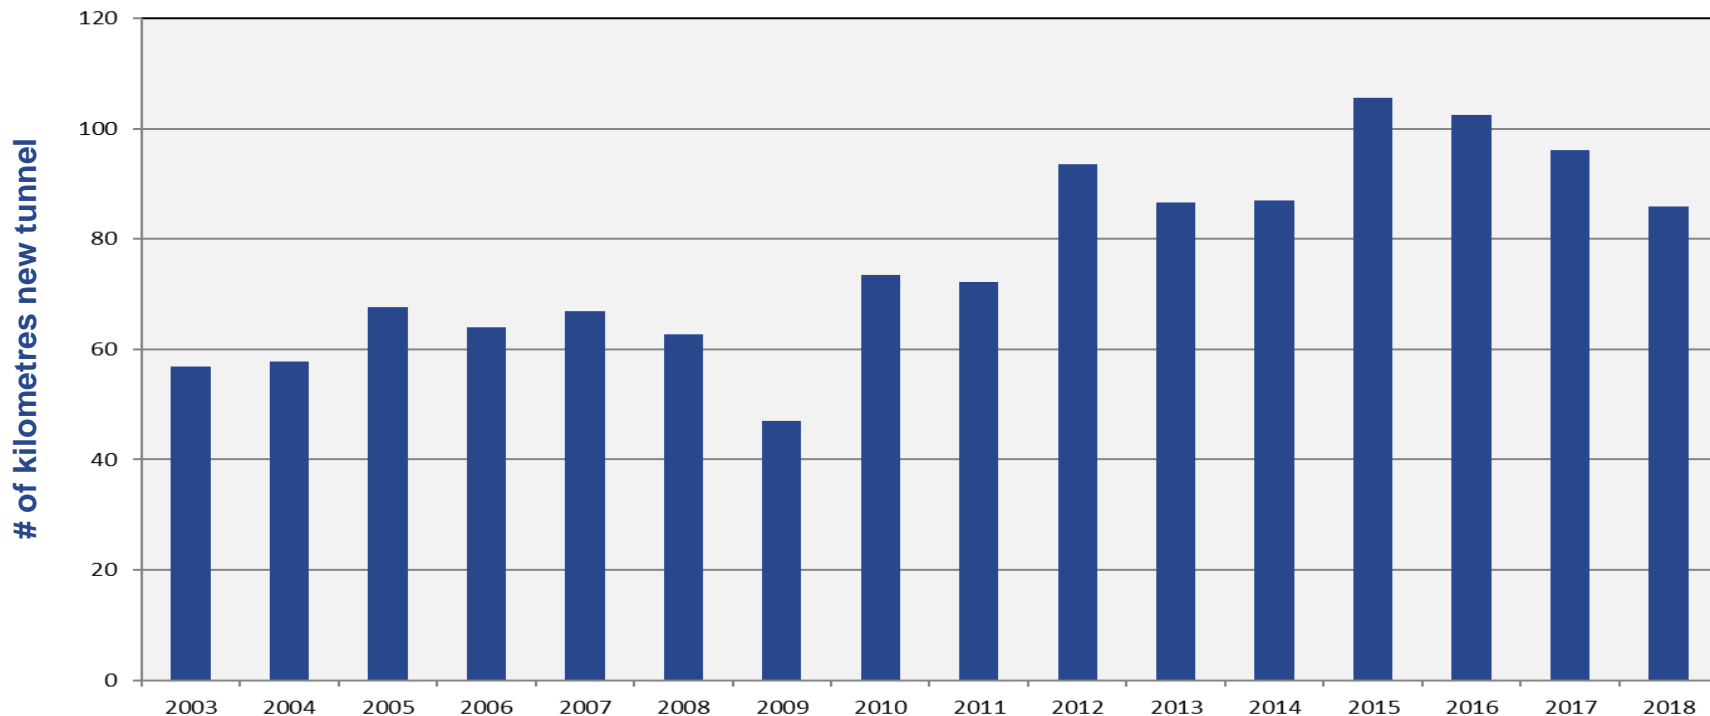

# Acciona-Ghella is on top with one project, while Skanska has almost the same volume with activity on many sites

# The number of tunnel contractors is stabil, but this years contractors are a bit different than the ones from last year

# The decrease in metres new tunnel continues due to lower volume, larger faces, and rehabilitation of old tunnels

# Decrease in number of metres excavated with TBM in 2018, - two of four TBMs on the Folloline finished in August
