The 3D model displays a large bridge foundation and a tall pylon. The foundation is shown with its internal rebar structure highlighted in yellow. The pylon has a complex internal framework. The surrounding terrain includes green fields and some buildings. A small cube labeled 'FRONT' is positioned near the top right of the pylon.

I'en

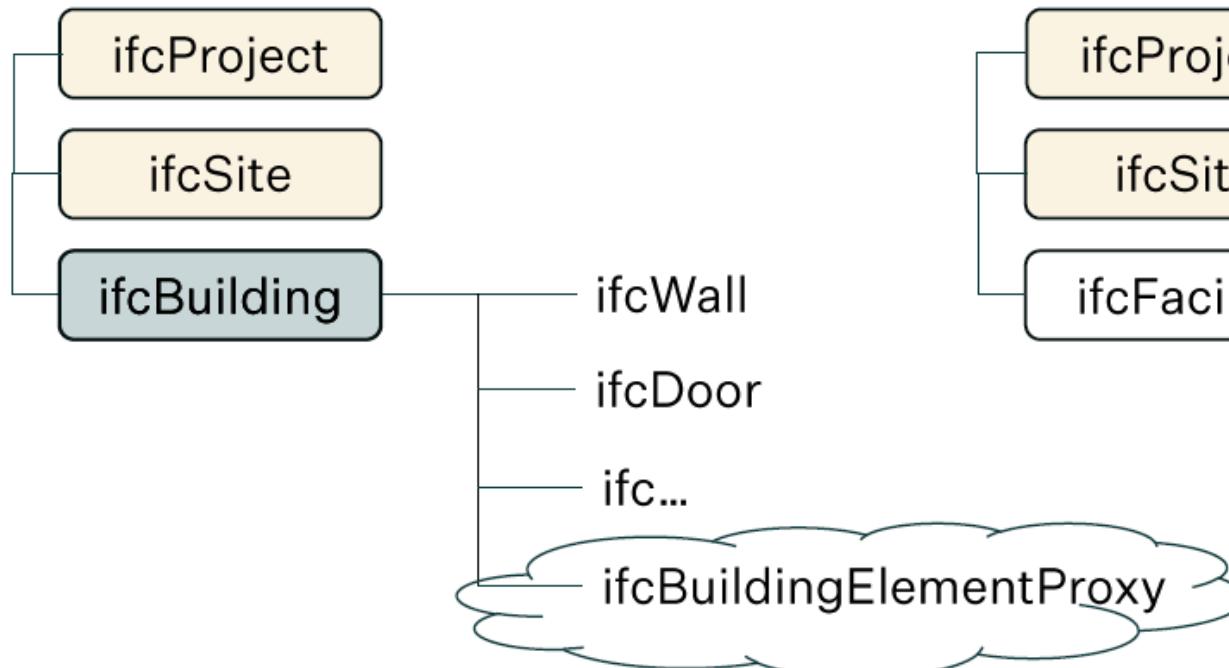

- I'en er essensen i BIM
- Vi har i dag det meste av informasjonen utførende trenger i modellene
- Standardiseringen pågår.
 - BuildingSmart
- Enn så lenge mye prosjektspesifikke løsninger
- IFC-formatet er mye brukt i norske samferdselsprosjekter.

IFC – Industry Foundation Classes

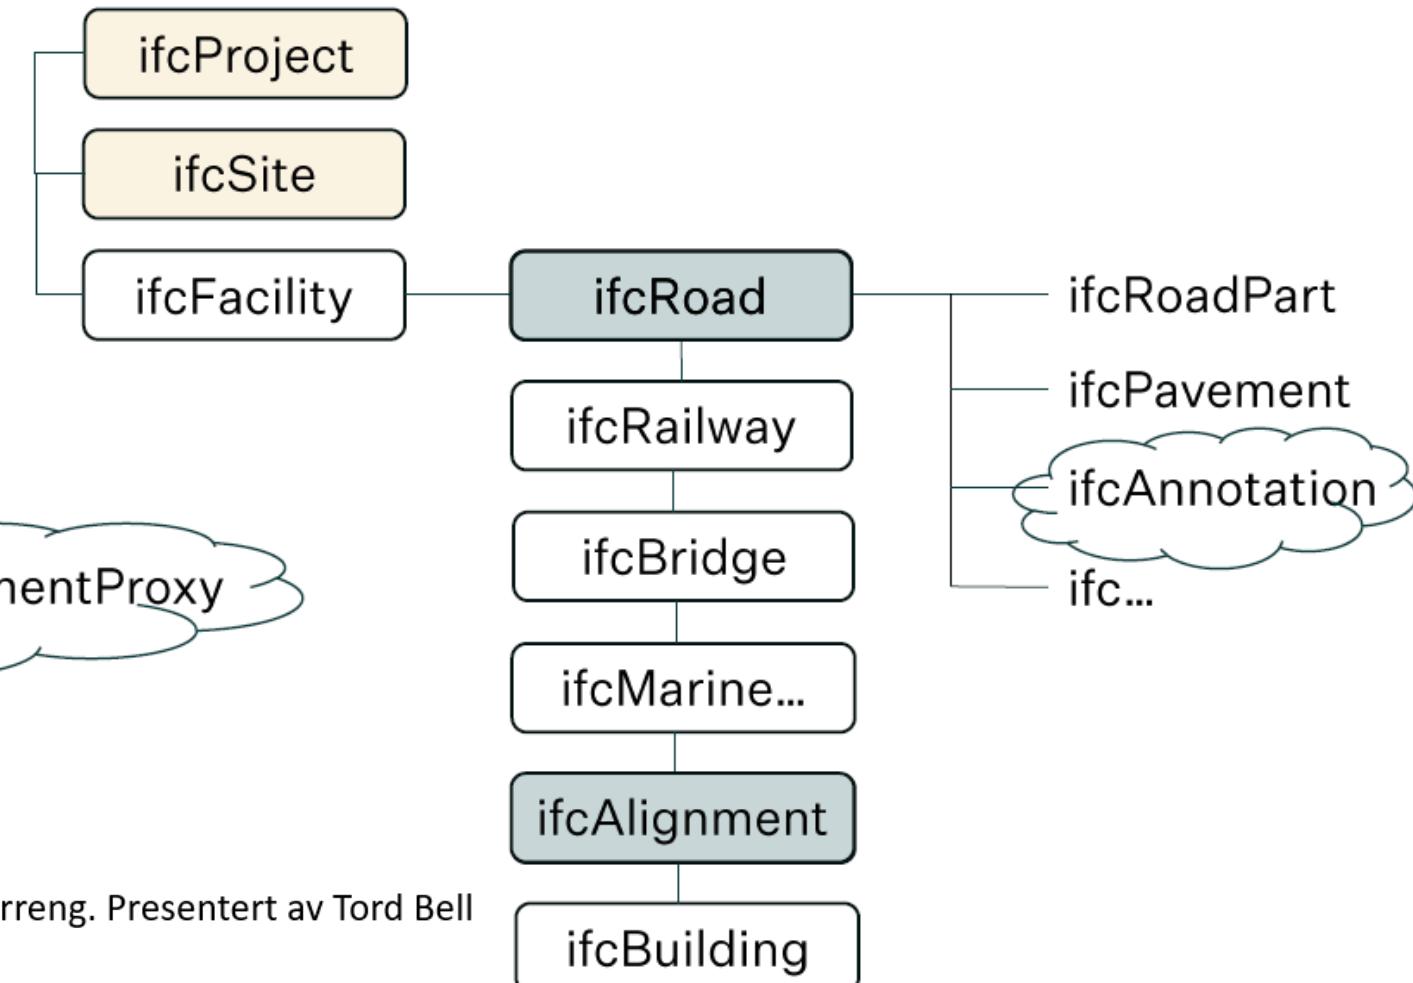

- Et industrispesifikt filformat for utveksling av bygningsinformasjonsmodellering (BIM) (BuildingSmart Norge, 2024)
- IFC filer er en fryst representasjon, som kan sammenlignes med PDF-er. Formatet er åpent og stadig i utvikling (BuildingSmart International, 2024a).
- Forskjellige versjoner → ikke alle visningsverktøy som støtter nyeste versjon (nå er det 4.3, første IFC 2.0 kom i 1999 (BuildingSmart International, 2024b)
 - Oppdateres jevnlig og inkluderer flere og flere objekter.

Nye klasser i IFC4x3

IFC 2x3

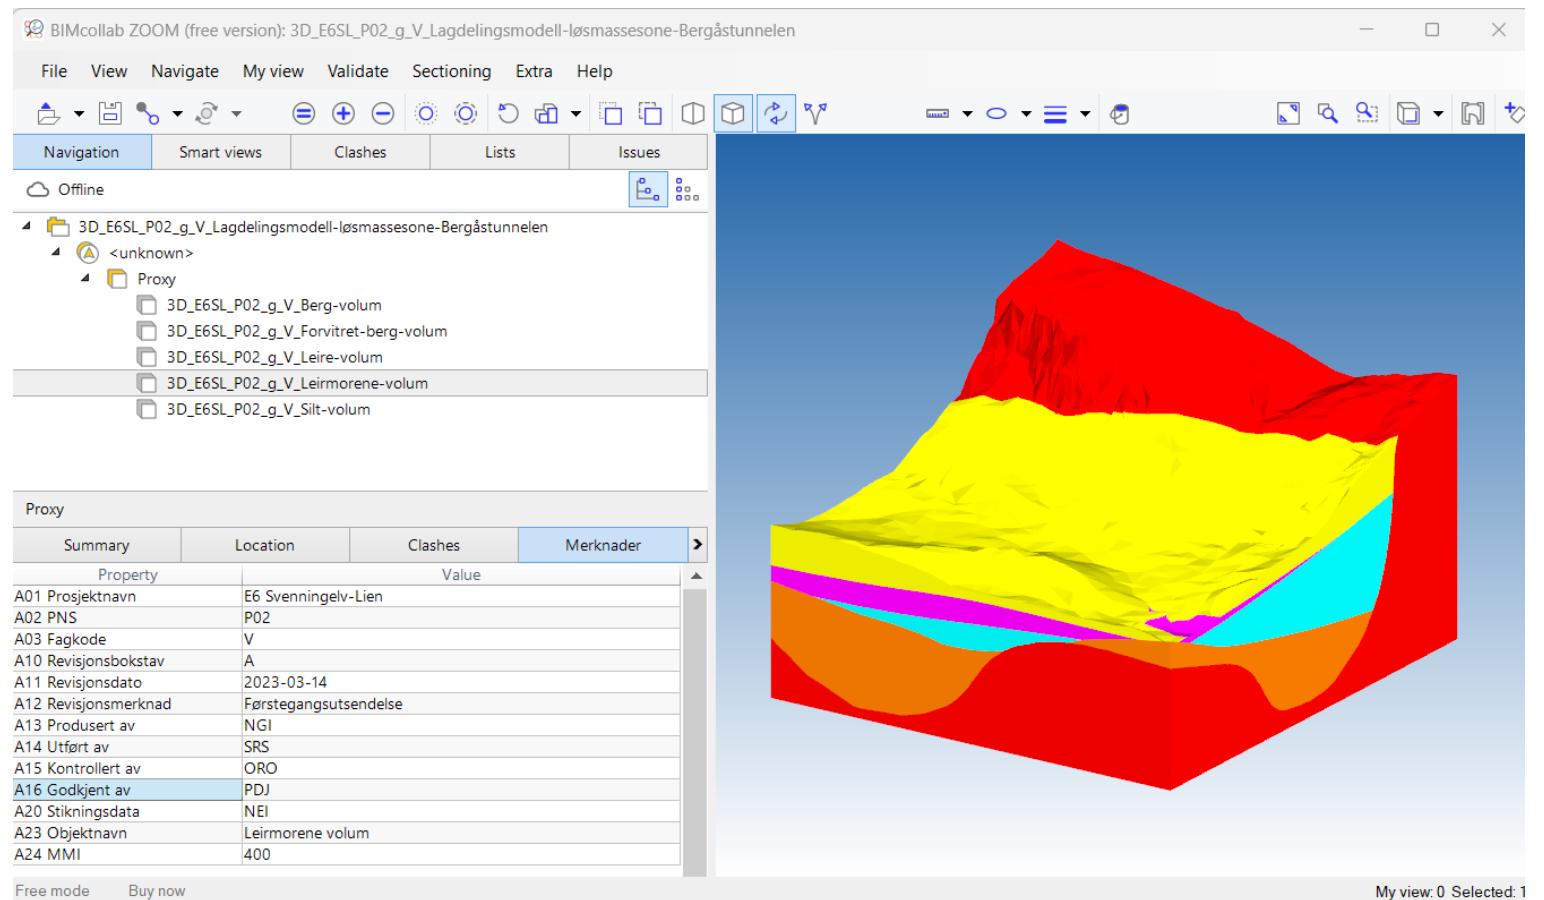

IFC 4x3

Eksempel IFC-fil

- Prosjektspesifikk løsning
- Nødvendige egenskaper samlet i et egenskapsdatasett
